🔗 [LinkedIn](#) | [Portfolio](#)

Summary

Experienced Android Engineer with **7+ years of experience** through many scaling mobile application projects. Skilled in **Kotlin, Jetpack Compose, MVVM/MVP, Firebase, GraphQL, and IoT integrations**, with a track record of handling complex and mature apps with **1 millions of users**. Currently adopting **Kotlin Multiplatform (KMP)** to expand capabilities across Android, iOS, and shared business logic.

Professional Experiences

PT BOBOBOX MITRA INDONESIA - Bandung, Indonesia

Android Engineer | Mar 2020 – Present

- Led re-architecture of Bobobox App from MVP → MVVM and single → multi-module structure, improving scalability and maintainability. Reduced maintenance overhead while maintaining feature parity and improving performance metrics with **8.5 out of 10.0 NPS score** and **60K Monthly Active Users**.
- Implemented comprehensive crash monitoring using Firebase Crashlytics, proactively identifying and resolving production issues. Reduced bugs by **99.9%** stability.
- Implemented **IoT features (MQTT protocol)** enabling control of smart pods (doors, lights).
- Began **adopting Kotlin Multiplatform (KMP)** for potential cross-platform **android-ios** adoption.
- Reducing **feature cost by 50%** of showing google maps on app.
- Mentoring junior engineers and helping mobile teams create team charter for strategic team roles.
- Helping QA Team by introducing and basic training of **Automation Testing** with **Maestro**.

PT AL QOSBAH INOVASI DIGITAL - Bandung, Indonesia

Senior Android Engineer Consultant | Oct 2021 – Nov 2023 | Part Time

- Contributed to strategic development planning by identifying and

implementing key architectural improvements, resulting in a **99%** reduction in application bugs within a **three-month period** and increased development to release within **6 months** and got **200K Monthly Active User** in a year.

- Consulted on and implemented advanced UI features, including the unique **highlight feature** for Quran Verses, which involved complex spatial calculations (**calculating X & Y coordinates** based on original image resolution and device scaling) to ensure pixel-perfect display across various devices.
- Designed and integrated robust background service capabilities for prayer time calculation using Work Manager and Alarm Manager, advising the team on reliable and resource-efficient scheduling strategies.

PT JASAMEDIKA SARANATAMA - Bandung, Indonesia

Android Engineer | Feb 2019 – Mar 2020

- Engineered healthcare applications (Buku Dokter, PSC 119) from scratch utilizing multi-module architecture and Koin dependency injection.
- Integrated Mapbox routing for real-time ambulance navigation within the PSC 119 application.
- Migrated legacy Java codebases to Kotlin, accelerating development cycles.
- Enhanced performance and scalability across internal HRIS and academic applications.

PT KINEST KREATIF IDEATA - Bandung, Indonesia

Junior Android Engineer | Oct 2018 – Dec 2018

- Developed an internal HRIS Android application implementing modular design and core Android architecture.
- Applied Dependency Injection to establish a scalable and maintainable codebase.
- Integrated REST APIs via Retrofit for reliable client-server data synchronization.

Technical Skills

- **Mobile Development & Frameworks:** Kotlin, Java, Swift, Android Jetpack (Compose, Navigation, Room), MVVM, MVI, Clean Architecture, Coroutines, Flow, Dagger2, Hilt, Koin, Work Manager, Background Processing, Widget, Modular Architecture, SDK Development, Coil, SQLDelight, ViewModel, LiveData, Kotlin Multiplatform, Compose Multiplatform, Coil, SQLDelight
- **Backend & Cloud Integrations:** RESTful APIs, GraphQL Integration, Firebase, MQTT, KTOR, Push Notifications, Strapi, FastAPI
- **Testing:** JUnit, Mockito, Kotlin Test, Unit/UI/Automation Testing (Espresso, Maestro), Code Review, TDD

- **Tools & Methodologies:** Git, Github, Gitlab, Gradle, Jira, Agile, Scrum, Postman,
 - **Advance Feature & Optimization:** A/B Testing, Performance Optimization, Real-Time Tracking, QR Code Scanning, Mobile Security, System Design, Software Architecture, Dependency Injection, User Experience (UX), IoT, Remote Configuration
 - **Leadership & Project Management:** Technical Leadership, Mentorship, Project Management, Product Management
-

Additional Information

- Experienced in **async collaboration tools** (Slack, Jira, GitHub) and working with distributed teams.
 - Google Play Portfolio: [Bobobox App](#), [Quran App](#).
-

Education

Bachelor of Informatics Engineering, Universitas Siliwangi – Indonesia
Tasikmalaya | Sep 2014 - Aug 2018
